PROFESSIONAL SUMMARY

- Third-year B.Tech Information Technology student with hands-on experience building full-stack applications, backend APIs, and developer tooling. Interested in software engineering, systems, and scalable product development, with growing exposure to Linux, networking fundamentals, and containerized deployments.

EDUCATION

Vellore Institute of Technology <i>B.Tech in Information Technology CGPA 8.72/10</i>	Aug 2024 – Jun 2028 <i>Vellore, Tamil Nadu</i>
St. Joseph's Sr. Sec. School <i>Senior Secondary Education (CBSE) 92%</i>	2024 <i>Auriya, Uttar Pradesh</i>
St. Joseph's Sr. Sec. School <i>Secondary Education (CBSE) 94.6%</i>	2022 <i>Auriya, Uttar Pradesh</i>

EXPERIENCE

Jurnident <i>Frontend Web Developer Intern</i>	Aug 2024 – Oct 2025 <i>Remote, Tamil Nadu</i>
• Collaborated with the engineering team on GitHub-based workflows, including branching, code review, and task delegation across multiple project deliverables. • Built a 3D interactive website using React and Spline, iterating on architecture and UI based on supervisor feedback to improve performance and usability. • Implemented reusable, responsive components with Tailwind CSS to speed up development across multiple pages and features.	

PROJECTS

PlugFit <i>Research & Development Project</i>	Ongoing <i>Python, FastAPI, TypeScript, Docker, MCP</i>
• Building an optimization layer for Model Context Protocol (MCP) servers that analyzes and restructures tool definitions to improve usability for AI agents. • Developing an automated pipeline to merge duplicate tools, remove redundant endpoints, and rewrite ambiguous tool descriptions, benchmarked using real-agent evaluations. • Designing a dashboard to visualize usability scores before and after optimization, with one-click deployment for publishing optimized MCP servers.	
Students' Welfare Intranet (DSW) <i>Official VIT Project</i>	Ongoing <i>Next.js, Express.js, PostgreSQL, Docker</i>
• Developing a centralized intranet for the Office of Students' Welfare, VIT Vellore, giving students unified access to information on clubs, chapters, councils, and events. • Designing scalable backend APIs and database architecture to organize student organizations, departmental workflows, and welfare resources. • Implementing role-based content structures and responsive interfaces to improve transparency between students and university administration.	
Riviera & Gravitas Websites <i>VIT Flagship Festival Websites</i>	Completed <i>React, Next.js, Tailwind CSS</i>
• Contributed to the official websites for VIT's flagship festivals, Riviera and Gravitas, building responsive interfaces for event discovery and registration. • Collaborated within a team using Git-based workflows to implement reusable components and optimize performance across devices.	

TECHNICAL SKILLS

Languages: Python, C, C++, JavaScript, TypeScript, SQL, HTML, CSS
Frameworks & Libraries: React, Next.js, React Native, Express.js, FastAPI, Flask, Django, Mongoose
Databases: PostgreSQL, MongoDB
Developer Tools: Git, GitHub, Docker, Linux, Postman, VS Code
Core Concepts: Data Structures, OOP, REST APIs, JWT Authentication, Database Design, Debugging
Systems & Networking: TCP/IP Fundamentals, DNS, HTTP/HTTPS, SSH, Docker Networking, Linux Servers

ACHIEVEMENTS

- Selected as an **Inner Core Member**, Google Developer Groups (GDG) VIT
